The screenshot shows a JupyterLab environment. On the left, the file browser displays a directory structure with a search bar and a list of files and notebooks. The notebook '00_hand_compute_c...' is selected. A speech bubble points to this notebook with the text 'Open your graded notebooks to see my comments!'. On the right, the notebook '00_hand_compute_c...' is open, showing a title bar with the notebook name and a toolbar. The notebook content includes a light blue box with the text 'Well Done dru!! See my answer under the student_solutions folder - Thanks, Chandru.' and 'This will be used to drive the telescope for imaging your assigned star'. Below this, the title 'Hand compute Celestial coordinates for your assigned star' is displayed. The notebook content continues with a welcome message to students and information about a spectroscopy class.

Well Done dru!! See my answer under the student_solutions folder - Thanks, Chandru.

This will be used to drive the telescope for imaging your assigned star

Hand compute Celestial coordinates for your assigned star

Dear students including new ones who just joined:

Welcome to BAROspection - Intro to Spectroscopy class scheduled to start Aug 15th @6:30 PM. To see the full details you can
